

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

Candidate Name: Kam Buckner

Phone: +1 773 294 9079

Campaign Name: Kam for Chicago Mayor

E-Mail: tara@kamformayor.com (Tara Farwana, Director of Campaign Operations)

Campaign Manager Name: Kendra-Sue Derby

Campaign Address: 5401 S. Wentworth Ave. Unit 12E

A completed questionnaire must be received by Wednesday, January 25, to have answers distributed to our stakeholders before early voting starts. Please return to rachelbr@fotp.org.

ABOUT YOUR BACKGROUND AND PRIORITIES RELATED TO PARKS

A. Briefly describe any accomplishments or projects you have been involved with related to parks.

Response:

As an aide to Mayor Mitch Landrieu in New Orleans, I helped oversee work and efforts in a number of City agencies and departments including the New Orleans Recreation Development Corporation. I helped coordinate doubling the budget and bringing 10 facilities back on line that had been shuttered since Hurricane Katrina. I also worked with Parks & Parkways and the New Orleans Health Department, where I was instrumental in the creation of the "FitNOLA" child recreation and health initiative.

At the Chicago Cubs, I helped put baseball diamonds in parks across the city and helped design and build Margaret Donahue Park in Lakeview. In fact, I was responsible for naming the park and am proud that my name sits on a plaque at the park's entrance.

Here in Chicago, as Executive Director of World Sport Chicago, I oversaw programming with the Chicago Park District for young people around the city. I also led our disabled veterans population through the Valor Games Midwest.

As a State Legislator, I've shepherded millions of dollars into the budget for capital improvements in parks like Lillian Hardin Armstrong, Washington Park, Bessemer Park and Lake Shore Park

My mayoral platform includes commitments to invest in parks and to create a robust network of facilities, spaces and programming, including committing to a limestone conservation approach for Promontory Point Park.

B. Are you planning to introduce legislation or initiatives to address any environmental justice issues? Do you have particular environmental priorities, park programming priorities, or see connections with other priorities for your community? If so, please identify those here.

Response:

Chicago can – and should – be a leader in the fight against climate change and climate injustice. We will need to partner with the State and Federal government to get the resources we need and implement a comprehensive solution, and we'll need to learn from what other major cities are doing to begin to make progress.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

I am proud to be the only Mayoral candidate with a robust and actionable environmental plan, which prioritizes:

- Establishing dedicated environmental justice & climate efforts in Chicago
- Developing green spaces throughout the City
- Creating Green Initiatives
- Establishing Greenwater resources
- Improving waste management
- Expanding the Openlands Plan to create even more open spaces with a focus on nature, wildlife, and aviary protections

These priorities overlap with my public safety, economic development, and housing plans. While fighting climate change we will also combat environmental injustice that has plagued our City.

You can view the full details of my plan here: <https://kamformayor.com/4-star-agenda/environment/>

C. Chicago's motto is Urbs in Horto (City in a Garden). In the most recent *We Will Chicago* planning process, park discussions were thinly and inadequately spread across all the pillars and not a central focus of planning. How will you prioritize parks or demonstrate that parks are critical to healthy, thriving communities and the entire city and its residents?

Response:

I grew up playing in Chicago's parks, participating in sports leagues at the parks, and enjoying Ridge park with my family. Our parks make a difference and I'm going to see to it that we prioritize investing in our parks and green spaces to ensure kids in future generations, including my son, can enjoy our parks as much as I have over the years.

Parks are an important community resource and I want to make sure they remain a priority which is why I plan to include the Park district in all zoning and environmental decisions and create a partnership with CPD on youth engagement. I also plan to expand upon the Openlands Plan, set to be instituted by 2023 and increase urban agriculture areas by creating greater opportunities for Urban farmers to develop land through business licenses and incentives.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE GENERAL QUESTIONS

Below are 12 topics related to parks. Please share your thoughts and policies on each subject using the list of bulleted questions as a guide.

- EQUITY PLAN FOR CHICAGO'S PARKS
- GREEN SPACE AND CREATING NEW PARKS
- NEW BUILDINGS IN PARKS
- LAKEFRONT
- ADDRESSING CLIMATE CHANGE
- COMMUNITY ENGAGEMENT AND PARK ADVISORY COUNCILS
- PARK PRIVATIZATION AND REVENUE
- BUDGET PROCESS AND RESOURCE ALLOCATION
- PARK ACCESSIBILITY, FACILITIES, & AMENITIES
- PARK PROGRAMMING
- SAFETY
- PARK DISTRICT OVERSIGHT

1) EQUITY PLAN FOR CHICAGO'S PARKS

Forty years ago, On May 13, 1983, the [Chicago Park District entered into a consent decree with the federal government](#), resulting from a three-year investigation and a 1982 federal lawsuit addressing racial discrimination in the allocation of resources within the park district. The decree sought to promote equal and non-discriminatory treatment of Black and Latino communities by establishing rigorous and detailed systems, procedures and schedules that could assure equity, responsiveness, and transparency for these neighborhoods and their parks. It was in effect for six years, and Friends of the Parks registered our displeasure when the court lifted the order even though the Chicago Park District was not in full compliance with the terms of the Consent Decree.

Many other large cities have a written equity plan or framework to guide work for their park district, but Chicago has no such plan or codified standards despite documented racial inequity in park access and resources per our 2018 State of the Parks report. Public parks on the South and West Sides of Chicago often have less access to building facilities, fewer programs, and less investment in parks.

- What policies do you support to address this inequity and improve the park-going experience in South and West Side neighborhood parks?

RESPONSE EQUITY PLAN FOR CHICAGO'S PARKS:

Inequities have plagued our city for too long. I'm committed to making sure resources go where they are needed most and ensuring that Chicago is a city that works for everyone that lives here. That includes equitable distribution of park funding for facilities, programming, and maintenance. Chicagoans shouldn't have to commute to a park because their local park has deteriorating facilities, is poorly maintained, or has limited programming. Every neighborhood needs access to a safe and functional park. As Mayor, I will make sure that we improve the park-going experience in South and West Side neighborhoods and I will make sure community members and the park advisory councils are empowered and part of the decision making process about how those resources are used in their existing parks or when creating a new park.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

2) GREEN SPACE AND CREATING NEW PARKS

While more than [98% of Chicagoans](#) live within a 10-minute walk of green space or a playground, **Chicago lags behind most other high-density cities in park acreage per capita and total city acreage committed to public parkland (9%)**. Residents' access to recreational amenities and facilities they hope to find in their parks is not equitable across the city. The West Side of the city has the least parks or green space. While most parkland is on the city's South Side, these parks receive less capital investment and programmatic funding than North Side parks and much of it is undeveloped or underdeveloped brownfield sites that do not yet support much or any public use. These facts demonstrate that Chicago continues to experience systemic racial inequity when it comes to accessing or creating new green spaces.

- How will you prioritize the creation of new green spaces and parks across Chicago? How will you include the community in the planning and development process?
- What metrics or factors will you use to determine which communities should receive new green space? What equity considerations will you include in your assessment?
- The Trust for Public Land's 10-minute "walk score" mentioned above includes Chicago Park District spaces (parks, playlots, and beaches) and any green space in the city, including Forest Preserves, spaces managed by NeighborSpace, the 19 boulevards managed by the Chicago Department of Transportation, and privately owned public spaces (POPs). With all these various groups stewarding green spaces, coordination and comprehensive planning can be difficult and complex. How will you sort through the different managers to coordinate increasing access to parkland and green spaces in the city?
- The Illinois state standard is 10 acres of green space for every 1000 residents. As urban planning and development occur, how will you ensure there is adequate green space for the community to thrive?
- Developers and the City have often tried to assert that publicly owned private spaces (POPs) will always be accessible to the public, just as if they belonged to the Chicago Park District. Historically POPs have not always been equally accessible to all residents as the private owner ultimately controls the space and City accountability mechanisms have been lacking. What is your vision for ensuring true public access to new green spaces being created in mega-developments and other planned developments?
- As the Chicago Park District plans construction of new facilities (pickleball courts, basketball courts, fieldhouses, etc.), how will you allocate resources to address the realities of racial inequity in Chicago and historic disinvestment and neglect of some communities? How will you include the community in determining what facilities and amenities are needed?
- Golf courses count as green space and as park acreage for residents, but the use is restricted to those playing a particular sport and paying a fee for service. What initiatives do you support to make such spaces dual purpose or to expand usage to more residents?

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

- As Chicago deindustrializes and closes former industrial sites, like General Iron and Damen Silos, large swaths of land and former buildings can be re-imagined and re-developed. For example, with the recent closing of General Iron in Lincoln Park and the development of Lincoln Yards, neighborhood advocates have asked for the site to be used as part of a new North Branch Park and Preserve. The preserve could expand access to the river for the whole city and decrease the green space deficit the community currently experiences and will get worse with the added residential density proposed for Lincoln Yards. How do you think comprehensively about the opportunity these sites and the transition across the city offers? How will you coordinate a vision across the city using these spaces to increase green space for all communities? How will you prioritize which neighborhoods or communities should experience development of these new de-industrialized green spaces first?

RESPONSE GREEN SPACE AND CREATING NEW PARKS:

NEW GREEN SPACES: My plan includes expanding upon the Openlands Plan to create even more open spaces with a focus on nature, wildlife, and aviary protections. It also includes increasing urban agriculture areas by creating greater opportunities for Urban farmers to develop land through business licenses and incentives.

I will involve community members in the green space planning process to make sure we are truly creating green spaces that are accessible and maximize the benefits to the community. We will identify spaces that have been forgotten and can be used to create more parks and open space. The development stage of each project will prioritize local community members when it comes to job opportunities.

10 acres of green space for every 1,000 residents should be our floor. We will put in place a Green space requirement for all developers to add green infrastructure that can also help us combat climate change. I will also make sure that all public spaces are accessible by the community by putting a mandate in place that allows the Department of Environment to create and oversee city accountability mechanisms.

METRICS: I would look at city wards and green space per capita to make sure we are investing more in areas with lower percentages of green space. This will help us make more equitable decisions about where to invest.

COORDINATION: My environmental plan commits to establishing, staffing, and fully funding the Department of Environment (DoE). The department will be led by a Commissioner, rather than a Director, to ensure institutional integrity that is not subject to mayoral inaction. The DoE will be tasked with creating a comprehensive plan that looks at Chicago's green spaces from a bird's eye view and works with the various existing stakeholders that manage the green spaces throughout the City. This will guarantee that we have transparency and clear coordination between the different managers to increase access to parkland and green spaces.

NEW FACILITIES: We need to make sure that we prioritize equity in building new facilities, and I'll make sure resources will go to where they are needed most. When new facilities are built in a park, I will involve community members in the planning and development process by requiring information campaigns and digital outreach so that community members don't miss out on the opportunity to contribute their feedback. We need to create parks that serve the needs and interests of the community members that will use them.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

GOLF COURSES: I would explore ways to expand the usage of these spaces. For example, one idea we can consider is opening golf courses or sports facilities to the public one day a week, which has been done in a lot of other countries. We could use a similar model to open these spaces certain times throughout the week and expand community access.

DEVELOPMENT: A lot of the polluting sites that are closing down were built in majority minority and poor neighborhoods and have contributed to environmental injustice that has had detrimental impacts on people's health and livelihoods. Development of these new de-industrialized green spaces will be prioritized based on communities with the highest need.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

3) NEW BUILDINGS IN PARKS

Chicago Park District spaces often share land with schools, museums or other public institutions. Most of the museums in parks are housed in a building or on the footprint of a former structure that already stood on the land—as opposed to new construction in a park. At times, new construction or renovations occur. Often city museums consult Friends of the Parks about these changes.

- What do you think about building new structures in Chicago parks?

In 2022 an unpermitted, unapproved building project was undertaken in a non-democratic process, using state funds, by the National Museum of Puerto Rican Arts & Culture in historic Humboldt Park next to the landmarked former stables building (and office of Jens Jensen).

- Please disclose any formal or informal leadership roles in the community that you have held or currently hold that relate to National Museum of Puerto Rican Arts & Culture and their plan to develop structures on public parkland.
- What did you know about or how were you involved with this project before construction was halted in September 2022?
- How will you offer leadership to remedy this situation?

RESPONSE NEW BUILDINGS IN PARKS:

When making decisions about new structures in Chicago parks, I would consult stakeholders and experts like Friends of the Park to make sure these decisions consider community input.

I was not involved in the National Museum of Puerto Rican Arts & Culture decision to develop structures on public parkland. As Mayor, I will ensure that community members and advocacy groups are involved in decisions that impact their communities to make sure that these decisions are made equitably and democratically.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

4) LAKEFRONT

Chicago's lakefront is a gem of the city and our city is unique in preserving the lake for all people. Currently, 26 of the 30 miles are publicly available for use and protected for the public, but two miles to the north and south remain cut off from public parks, beaches, and paths.

- What policies do you support to ensure the lakefront remains free and clear for all Chicagoans to enjoy? Please consider both the preservation of space (such as the Lakefront Protection Ordinance and Public Trust Doctrine) and practices that affect use (such as facilities and policing).
- What efforts do you support to increase access to the city's lakefront by pedestrians, transit riders, cyclists, and people using wheelchairs and other mobility supports?

RESPONSE LAKEFRONT:

As a State Representative, I represent a district that stretches along the Lakeshore, so I know how important it is to preserve our lakefront. In fact, I founded the Lakeshore Caucus in Springfield: this group works to address erosion issues on Lake Michigan and create solutions across our state. I've also advocated to keep the lakefront unencumbered. As Mayor, I will look for ways to open the other four miles of the lakefront, prioritize safety and accessibility on the trail, and reimagine Lakeshore Drive so it isn't only serving those with vehicles.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

5) ADDRESSING CLIMATE CHANGE

In February 2020, Chicago declared a climate change emergency in response to severe storms and lakeshore erosion. Lakefront parks and beaches across the city suffer a battering of lake waves and the loss of sand and erosion at alarming rates. It is estimated that the storms of 2020 caused [\\$37 million in damages](#) to beaches and parks. Erosion, intense storms, and the failing of concrete revetments, metal girders and rock barriers installed by U.S. Army Corps of Engineers have caused [four beaches in Rogers Park](#) to be washed away and closed; revealed infill at Rainbow Beach as sand was lost; resulted lake water levels reached the top of the stairs at Calumet Park Beach House; and led to the permanent closing of a third of the [Northerly Island walking path](#)—merely a year after it was opened in 2015.

The threat is only going to continue. Concrete, metal and rock barriers push higher water to unprotected places. Lake levels have always fluctuated, but scientists believe lake levels will continue to trend higher. Regardless of lake level, the increased severity of storm surges due to climate change place our [shoreline communities at greater risk](#) of flooding and damage.

Nature-based solutions are a resilient, long-term, cost-effective method to manage the impact of climate change along the lake and across the city. This approach uses natural ecosystems to provide protection such as wetlands for flood mitigation; trees and prairie spaces to combat the heat island effect; and mangroves to reduce the impact of waves, storm surge, and coastal erosion. These ecosystems also soften climate impacts, such as extreme weather, and reduce climate pollution by capturing carbon dioxide from the air and sequestering it in plants and soils.

Parkland and beaches are already a nature-based solution. The sand, soil, and plantings provide buffering and absorption that helps manage the fluctuation in lake levels and more frequent and severe storms. These green spaces furnish lakefront with recreational or contemplative areas and habitats for humans and wildlife to enjoy.

- How will you support the preservation or expansion of parkland, native plants, and healthy, mature trees and new tree planting across the city to combat climate change impacts that affect the shoreline and inland communities?
- In 2022, a [community ballot referendum](#) in the 5th, 7th, and 10th Wards asked the city to stop cutting down trees in Jackson Park and the area surrounding the South Shore Cultural Center passed by 82%. The trees are at risk due to the construction of the Obama Presidential Center and the proposals to merge Jackson Park and the South Shore Cultural Center golf courses into a new PGA golf course. As Mayor, how will you work to support the community's preference to save the trees in Jackson Park, the South Shore Cultural Center, and the surrounding community areas?
- What will you do to support vulnerable shoreline communities from the threat of flooding, erosion, and the impact of climate change?

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

- A toxic dump occupies 50 acres of shoreline on one of the last critical pieces of land on the South Side to complete Daniel Burnham's vision of a park system spanning the entire Chicago lakefront. The [Chicago Area Confined Disposal Facility \(CDF\)](#) sits on Lake Michigan between the Calumet River and Calumet Park in the 10th Ward. The land is owned by the Chicago Park District but leased to the U.S. Army Corps of Engineers to store dredge until full. In 2022, the CDF maxed out the storage space and the U.S. Army Corps of Engineers has asked to expand the facility 25 feet vertically to keep it open. The site, built in the 1980s, is a legacy of previous industrial uses of the river, the only industrial or toxic site on Chicago's shoreline, and is leaking into the Calumet River and Lake Michigan--leaking that could worsen with rising water levels and storm surges fueled by climate change, further allowing for the leaching of toxins into our drinking water. Chicago residents have waited almost 40 years for the land to be returned and created into a public park. As Mayor, what next steps do you support related to the CDF?

RESPONSE ADDRESSING CLIMATE CHANGE:

I'm committed to making sure there is a transparent process for all of these solutions and make sure that community input is factored in at every step. I would empower the Urban Forestry Advisory Board to make decisions that support the community as well.

I'll also ensure the Department of Environment is charged with creating a comprehensive vision for environmental protection in our city. That will include preservation of our parks, protecting our shorelines, and coming up with a plan for the CDF.

As mentioned in a previous question, I also founded the Lakeshore Caucus in Springfield: this group works to address erosion issues on Lake Michigan and create solutions across our state. This group continues to advocate for protecting the shoreline and the communities along the shoreline.

I've released a comprehensive environmental platform that also commits to protecting our people and developing these spaces. You can read the full platform here:

<https://kamformayor.com/4-star-agenda/environment/>

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

6) COMMUNITY ENGAGEMENT AND PARK ADVISORY COUNCILS

About 200 of Chicago's over 600 parks, beaches, playlots, and playgrounds have recognized Park Advisory Councils (PACs), resident groups of committed volunteers who support their parks through volunteerism, fundraising and other activities. Many PACs want influence over programs and maintenance and decisions about how parks will be used, but in reality, many feel left out of those decisions. At times, new permits are handed out for large events or art installations and PAC members or leadership don't find out until the event is underway or changes are being made to the park.

- Across the city there is no required or standard process around public notice and community input for park projects. How will you make sure that the public is informed and engaged in development, capital improvements, urban planning, large event or space rentals, and park planning decisions across the city?
- How will you engage with Park Advisory Councils in urban planning, budgeting, funding decisions, considering capital improvement, determining park programming, and deciding what events or installations are placed in parks across the city?

RESPONSE COMMUNITY ENGAGEMENT AND PARK ADVISORY COUNCILS:

I will support ordinances for participatory decision-making in and around the parks. I would also strengthen the Park Advisory Councils and involve them in parks decision-making. As mentioned previously, it's critical to make sure that these decisions are made democratically, not unilaterally. My administration will empower organizations and community groups and make sure their voices are heard.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

7) PARK PRIVATIZATION AND REVENUE

The Park District generates most of its income from property taxes, and over the last decade, its share of those taxes has declined from 6.1% to 4.7%. The average property tax unit pays \$260 towards the Park District's budget.

To supplement income, the Chicago Park District has increased revenue generating activity – raising fees for harbor and golf courses; issuing permits and renting out parks for private festivals; contracting with more concessionaires or other vendors; adding billboard or advertising; renting space for Amazon lockers; increased renting out park buildings and facilities as special event spaces. Some of these activities close off parkland and public facilities for weeks during the summer and over popular weekends, damage park facilities, and create a distraction for human and animal park users who seek tranquility or a natural oasis. While some renters and permit holders repair park damage, it takes months for vegetation to regrow or capital improvements to be finished, impeding park use far beyond the closures.

Some of the most recent notable examples of these revenue generating activities have been new contracts with Lollapalooza, the NASCAR race planned for 2023, and mega-festivals in Douglass Park. Residents across the city cite a feeling that parks have been commercialized to the point that threatens their role as public, community spaces for people.

- As park district spaces have refocused on revenue-generating outside events, many community partners and programs have been booted from park district buildings and grounds, or can no longer afford to use the space. What policies do you support to prioritize the use of park space for residents and community groups over revenue generating activities and improve community engagement by private groups seeking to operate for profit in public parks?
- The income from these events does not go a specific park, but rather to the Park District budget as a whole, leaving some residents to feel their park bears the brunt of the burden without reaping benefits. How do we ensure the impact and benefits of these rental events or fees are spread equitably?
- In the need to find new funding sources or expand programming, the Park District often balances private or non-profit partners and community programming, users, or needs. At times the interests of these different park users can be at odds. One example is a private baseball program that wanted to pay for and install new lights at [Welles Park](#), but some community members successfully opposed it. How will you manage the competing interest of various stakeholders when money is involved?
- When permits are issued for large music festivals or events, like the NASCAR race, the Park District does not have to consult aldermen, but the event requires resources and time from multiple city departments, such as the police department to manage crowds, CDOT to reorganize traffic, and Streets and Sanitation to clean up. What policies do you support to increase coordination between city agencies, community members, and the Park District when determining what large events happen in parks?

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

- To what extent should the Park District's budget rely on private, revenue generating events, vendors and concession stands, fees for service, advertisements (i.e. billboards), and renting the parks to for-profit groups?

RESPONSE PARK PRIVATIZATION AND REVENUE:

We can explore public-private partnerships, but those should never be at the expense of the residents of the communities that the parks are meant to serve. Parks are a public good and should serve as such.

We need to practice equitable budgeting for our parks to make sure that the parks in high-need communities are getting the resources they need to support residents.

I would pass an ordinance that requires coordination between city agencies, community members, and the Park District to make sure events that use our public spaces are designed collaboratively.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

8) BUDGET PROCESS AND RESOURCE ALLOCATION

The Chicago Park District's annual budget process offers a public hearing, an online forum for input, and a vote at an open board meeting. It is questionable whether there is adequate space for resident input or sufficient power and influence ascribed to their input. Many park activists are unaware that the online forums exist or how to access them, and they face barriers to attending the public meetings.

- The Chicago Park District should actively engage park stakeholders across the city in the budgeting process, particularly with the Capital Improvement Projects. Efforts should be made to understand and address any barriers to participation from historically disenfranchised populations. What will you do to help the Chicago Park District find ways to extend more budgetary control to the public and incorporate community participation into their annual budgets?

RESPONSE BUDGET PROCESS AND RESOURCE ALLOCATION:

I will engage in transparent budgeting and ensure residents are able to have a voice. I would also institute a resident engagement ordinance to support these efforts.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

9) PARK ACCESSIBILITY, FACILITIES, & AMENITIES

In the South and West sides of the city, larger park or natural areas are not easily accessible by public transportation. Many parks and natural areas typically lack accessibility for people with disabilities, or only a portion are accessible. While some heavily-trafficked areas like the Lakefront Trail may tend to have open and clean bathrooms, many other parks have dirty, locked, or no bathroom facilities. Without access to a bathroom, the time residents can spend or activities they can engage in at a park are limited. Some parks lack lights, clear parking spaces, signs at the entrance, multilingual signage or signage throughout to identify elements of the park. In some cases, roads leading into parks are blocked with gates and barricades at all hours.

- What steps will you take to ensure our parks, playlots, beaches, and trails are welcoming and accessible places for everyone?
- Pet owners bring their dogs to parks, playlots, paths, and beaches across the city. Dogs can also be a barrier to other residents' enjoyment or a threat to wildlife. How will you engage with various points of views about dogs in parks?
- Many field houses across the city are often closed on weekends and evenings. These closures mean people lack access to bathrooms, staff assistance or programming. Similarly, park bathrooms outside field house are often locked, or many parks have no bathroom. What will you do to make sure park field houses and the resource they provide can reach more residents?
- As the Chicago Park District plans improvement and maintenance of fieldhouses, playgrounds, and other recreation facilities, how will you prioritize resources based on historic disinvestment faced by some parks and communities? How will you include the community in the decision-making process? How will a commitment to racial equity impact your actions?
- Homeless encampments appear in parks across the city. For example, [Touhy Park](#) has seen an encampment in the park for almost 2 years. The Park District has moved some activities to neighboring parks. The Police Department and the City has a policy not to evict people staying on public land. What policies and actions do you support to address encampments that will manage the needs of the various people involved?
- Often, new construction developments are allowed to use developer-owned "publicly accessible" green spaces to satisfy open space requirements rather than Chicago Park District-controlled land. When private corporations dictate the development, management, and public access to green spaces, it seldom leads to park spaces desired by Chicago. These privately administered spaces are subject to different operating hours and rules than local parks. Additionally, when departments in the City government collaborate for new development or capital improvement to be "shared," the park users miss out on access or design of the space. An example is [Whitney Young's Sports Complex](#), funded entirely with tax-increment financing. What is your vision to ensuring true public access to new green

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

spaces, facilities, or amenities that are a funded with public dollars or promise public access? How will you use your position to support that vision?

RESPONSE PARK ACCESSIBILITY, FACILITIES, & AMENITIES:

Accessibility is critical across our city – it's why I released a complete [accessibility plan](#) earlier this month that outlines provisions to make sure that we build a Chicago that works for everyone. The problem is, many of our parks are only accessible from 9am - 5pm; the majority of the time that our parks are open are when our kids are in school. We need to make our field houses accessible to residents for as many hours as possible, and for as many hours as we can that people actually need them. That means keeping these resources open from 5-9, not just 9-5.

Park Advisory Councils should work with the city to help us come up with a comprehensive vision for these spaces. In my administration, private companies will no longer dictate the development of green spaces – the city will own the vision to make sure it's supporting our communities.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

10) PARK PROGRAMMING

Annually, more than 350,000 people participate through the Chicago Park District in thousands of sports, recreational, cultural, and environmental programs across the city. Yet the distribution of programs is often inequitable and mismatched, failing to meet the needs of local communities effectively. Even preliminary research indicates dramatic inequities across the city in the amount of programs and services offered. At times, programs feel dropped into a community without community input or research. In addition, the programs families are looking to for their health, cultural, and recreation may also be financially out of reach.

Where processes existed under the 1983 Consent Decree to ensure equitably distributed and responsive programming, many parks now lack the programs that are culturally relevant and affordable.

- Parks can be essential resources for people of all ages in a community, especially because they offer classes, camps, pools, exercise equipment and facilities, and chances to socialize. What resources will you invest in parks to prioritize use by diverse populations – seniors, families and children, people with disabilities, and teenagers? How will you ensure park programming is culturally relevant to BIPOC communities that have experienced exclusion and disinvestment?
- What will you do to support residents and community groups to have access to park space and programming for no or low cost?
- Parks across Chicago do not have the same access to sufficient, culturally relevant, and affordable programs or have space maintained to meet the needs of the community. What will you do to ensure equity in park programming and resources (facilities, maintenance, etc.) for parks across Chicago, keeping in mind the historic underinvestment in West and South Side parks?
- How will you include the community in program design and program offering in their parks to make sure it is sufficient, culturally relevant, and affordable and to proactively account for external community problems related to public safety and violence?

RESPONSE PARK PROGRAMMING:

I will create a comprehensive equity plan for park spaces, buildings, and programming. We need to make sure that we invest in communities that have been historically divested and give their parks the resources they need to have equitable programming. As mentioned before, I'm committed to making sure that our community members are involved in these conversations so that decisions are made democratically and in the interest of the communities they serve.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

11) SAFETY

Feelings of safety and security greatly shape how park spaces are experienced. While some park users feel vulnerable when parks are too empty, others want quiet, wide-open, empty spaces. Some fear gun violence, and others fear oppressive police presence. Some are worried about playground conditions, and others are worried about vandalism. Some want more lights or call boxes. All of these are important considerations as we address safety concerns.

In the summer of 2022, as a response to the death of Chicago teenager, a curfew was enacted at Millennium Park to restrict event access to the park for young residents not accompanied by an adult or attending a ticketed event. In multiple Listening Tour sessions in different parts of Chicago, we heard similar statements that represent a specific loss of access to park amenities after violence occurred in their parks. If the response to select instances of violence in parks is to close, restrict, or remove certain amenities, this seems like the beginning of a very dangerous trend of the Chicago Park District punishing entire communities for the actions of a few.

- How will you approach safety in a way that does not unfairly punish entire communities for the behavior of the few?
- How would you ensure residents of all ages can access public amenities while balancing concerns for public safety?
- What steps will you take or policies will you support to increase the public safety of Chicago's parks, playlots, playgrounds, paths, and beaches beyond increasing police presence?

RESPONSE SAFETY:

Safe parks exist in safe communities, and safe communities exist in safe cities. My [Safer-77 plan](#) for Chicago prioritizes both safety and justice and invests in the resources our communities need to thrive. Making sure that we have the right systems in place for our residents to use these public spaces is key. Beyond the provisions I've outlined in my Safer-77 plan, we need to invest in other programs – like [affordable housing](#) and [education](#) – so everyone in our city feels protected.

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

12) PARK DISTRICT OVERSIGHT

- The Chicago Park District is not a department of the city government, but a separate governmental entity. However, the Chicago Park District's Board of Commissioners' members are nominated by the mayor and must be approved by the Committee on Special Events, Cultural Affairs and Recreation. What policies do you support to make sure nominees have **demonstrated relevant experience, background and skills sets related to parks?**
- How will you use your role to provide oversight to the parks, playlots and beaches in the Chicago Park District as whole?

RESPONSE PARK DISTRICT OVERSIGHT:

We need to put people into leadership who have the relevant experience and a proven track record to get this work done. I'll ensure that the people in charge have that experience and consult with the communities and advocacy groups who have been doing this work on the ground.
