

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

Candidate Name: **Roushaunda Williams**

Phone: **312-498-2543 (Lou Weeks)**

Candidate for Ward #: **46**

E-Mail: roushaundawilliams@gmail.com

Campaign Name: **Roushaunda Williams for Alderwoman/Ward 46**

Campaign Manager Name: **Lou Weeks**

Campaign Address: **4600 N Clarendon, #601, Chicago, IL 60640 (Committee address: PO Box 687, Chicago, IL 60690)**

A completed questionnaire must be received by Friday, January 27 to have answers distributed to our stakeholders as early voting starts. Please return to rachelbr@fotp.org.

ABOUT YOUR BACKGROUND AND PRIORITIES RELATED TO PARKS

A. Briefly describe any accomplishments or projects you have been involved with related to parks.

Response:

From my time as a social worker for children and senior citizens, I know that access to safe public spaces is very important in promoting healthy communities and allowing children, family and the elderly to have a better quality of life.

B. Are you planning to introduce legislation or initiatives to address any environmental justice issues? Do you have particular environmental priorities, park programming priorities, or see connections with other priorities for your community? If so, please identify those here.

Response:

We should take a thoughtful, comprehensive approach to ensure that development creates an overall positive impact on our communities and our city. We must consider the environmental impacts, the quality of the jobs created, the economic impact, and the quality-of-life impacts for residents. All these factors must be weighed carefully.

I can't count the number of times I have read or watched news reports that correlate the incidence of diabetes in poor people with their over consumption of unhealthy food... including sugary drinks like soda. I suppose that blaming people for their health issues somehow relieves everyone else from sharing in that blame. Where do we hide from the insidious nature of lead in drinking water? We tell kids to drink water. We tell them not to drink soda. But then we expose them to danger and damage from the invisible lead in the water our cities pipe into their homes. All Chicagoans deserve safe drinking water. We should work closely with our state and federal legislators to advocate for additional financial resources to expedite the efforts. We should support our City's efforts to hire the necessary workers to do the hard work of replacing the lines. We should also consider ways to expand outreach efforts to encourage low-income residents to apply

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

for lead service line replacements funded by the city and streamline the application process. We should learn from other cities who have undertaken similar efforts. We should stop pretending we don't see.

C. Chicago's motto is *Urbs in Horto* (City in a Garden). In the most recent *We Will Chicago* planning process, park discussions were thinly and inadequately spread across all the pillars and not a central focus of planning. How will you prioritize parks or demonstrate that parks are critical to healthy, thriving communities and the entire city and its residents?

Response:

We must ensure that we protect and maintain our parks and public spaces, including the Lakefront, and keep in mind the future generations that will be impacted by our decisions today. We should also look to ensure that there is equity in terms of the location and accessibility of green space, parks, public programming throughout our City.

GENERAL QUESTIONS

Below are 11 topics related to parks. Please share your thoughts and policies on each subject using the list of bulleted questions as a guide.

1) EQUITY PLAN FOR CHICAGO'S PARKS

Forty years ago, On May 13, 1983, the [Chicago Park District entered into a consent decree with the federal government](#), resulting from a three-year investigation and a 1982 federal lawsuit addressing racial discrimination in the allocation of resources within the park district. The decree sought to promote equal and non-discriminatory treatment of Black and Latino communities by establishing rigorous and detailed systems, procedures and schedules that could assure equity, responsiveness, and transparency for these neighborhoods and their parks. It was in effect for six years, and Friends of the Parks registered our displeasure when the court lifted the order even though the Chicago Park District was not in full compliance with the terms of the Consent Decree.

Many other large cities have a written equity plan or framework to guide work for their park district, but Chicago has no such plan or codified standards despite documented racial inequity in park access and resources per our 2018 State of the Parks report. Public parks on the South and West Sides of Chicago often have less access to building facilities, fewer programs, and less investment in parks.

- What policies do you support to address this inequity and improve the park-going experience in South and West Side neighborhood parks?

We need to address the root causes of the reasons behind why the South and West Sides have less access to building facilities, fewer programs, and less

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

investment in parks. I believe there is an important connection to investment overall in areas of our City that has experienced disinvestment historically. We should seek to increase investment in these areas with regard to parks, infrastructure and programming. We should also seek to create and retain high-quality jobs for residents of these areas. Creating paths to high-quality jobs allow residents to make enough to reinvest in their community. IT means a person only needs to work one job and therefore has time to spend in our city's parks and public spaces with their family.

RESPONSE EQUITY PLAN FOR CHICAGO'S PARKS:

2) GREEN SPACE AND CREATING NEW PARKS

While more than [98% of Chicagoans](#) live within a 10-minute walk of green space or a playground, **Chicago lags behind most other high-density cities in park acreage per capita and total city acreage committed to public parkland (9%)**. Residents' access to recreational amenities and facilities they hope to find in their parks is not equitable across the city. The West Side of the city has the least parks or green space. While most parkland is on the city's South Side, these parks receive less capital investment and programmatic funding than North Side parks and much of it is undeveloped or underdeveloped brownfield sites that do not yet support much or any public use. These facts demonstrate that Chicago continues to experience systemic racial inequity when it comes to accessing or creating new green spaces.

- How will you prioritize the creation of new green spaces and parks in your ward? How will you include the community in the planning and development process?
- What metrics or factors will you use to determine which communities should receive new green space? What equity considerations will you include in your assessment?
- The 10-minute Trust for Public Land “walk score” mentioned above includes Chicago Park District spaces (parks, playlots, and beaches) and any green space in the city, including Forest Preserves, spaces managed by NeighborSpace, the 19 boulevards managed by the Chicago Department of Transportation, and privately owned public spaces (POPs). With all these various groups stewarding green spaces, coordination and comprehensive planning can be difficult and complex. How will you sort through the different managers to coordinate increasing access to parkland and green spaces in your ward?
- The Illinois state standard is 10 acres of green space for every 1000 residents. As urban planning and development occur in your ward, how will you ensure there is adequate green space for the community to thrive?
- Developers and the City have often tried to assert that publicly owned private spaces (POPs) will always be accessible to the public, just as if they belonged to the Chicago Park District. Historically POPs have not always been equally accessible to all residents

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

as the private owner ultimately controls the space. What is your vision for ensuring true public access to new green spaces being created in mega-developments and other planned developments?

- As the Chicago Park District plans construction of new facilities (pickleball courts, basketball courts, fieldhouses, etc.), how will you allocate resources to address the realities of racial inequity in Chicago and historic disinvestment and neglect of some communities? How will you include the community in determining what facilities and amenities are needed?
- Golf courses count as green space and as park acres for residents, but the use is restricted to those playing a particular sport and paying a fee for service. What initiative do you support to make such spaces dual purpose or to expand usage to more residents?
- As Chicago deindustrializes and closes former industrial sites, like General Iron and Damen Silos, large swaths of land and former buildings can be re-imagined and re-developed. For example, with the recent closing of General Iron in Lincoln Park and the development of Lincoln Yards, neighborhood advocates have asked for the site to be used as part of a new North Branch Park and Preserve. The preserve could expand access to the river for the whole city and decrease the green space deficit the community currently experiences and will get worse with the added residential density proposed for Lincoln Yards. How do you think comprehensively about the opportunity these sites and the transition across the city offers? How will you coordinate a vision across the city using these spaces to increase green space for all communities? How will you prioritize which neighborhoods or communities should experience development of these new de-industrialized green spaces first?

We should ensure that all residents have access to safe green space and parks within walking or rolling distance. We should involve the community and residents who are most impacted by a lack of green space as we explore ways to remedy this.

We should be guided by values of equity and justice when determining impacts on the community and the city as a whole. We should proactively seek to include the voices of those who are least often at the table.

RESPONSE GREEN SPACE AND CREATING NEW PARKS:

3) LAKEFRONT

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

Chicago's lakefront is a gem of the city and our city is unique in preserving the lake for all people. Currently, 26 of the 30 miles are publicly available for use and protected for the public, but two miles to the north and south remain cut off from public parks, beaches, and paths.

- What policies do you support to ensure the lakefront remains free and clear for all Chicagoans to enjoy? Please consider both the preservation of space (such as the Lakefront Protection Ordinance and Public Trust Doctrine) and practices that affect use (such as facilities and policing).
- What efforts do you support to increase access to the city's lakefront by pedestrians, transit riders, cyclists, and people using wheelchairs and other mobility supports?

Our Lake and Lakefront is a critical natural resource that we must protect for the next generations. It is crucial not only for environmental reasons, but for the quality of life of our residents and our place as a top tourist destination. We need to take pedestrian safety seriously and continue to explore ways to make our Lakefront and our city as a whole walkable, roll-able and safe for all residents. We also need to make sure that any fines or fees do not disproportionately impact low-income residents. I will be paying close attention to the Smart Streets and Smart Loading Zone Pilots that were introduced into City Council this month. We should learn from these pilots and work to implement effective pieces more broadly throughout the city.

RESPONSE LAKEFRONT:

4) ADDRESSING CLIMATE CHANGE

In February 2020, Chicago declared a climate change emergency in response to severe storms and lakeshore erosion. Lakefront parks and beaches across the city suffer a battering of lake waves and the loss of sand and erosion at alarming rates. It is estimated that the storms of 2020 caused [\\$37 million in damages](#) to beaches and parks. Erosion, intense storms, and the failing of concrete revetments, metal girders and rock barriers installed by U.S. Army Corps of Engineers have caused [4 beaches in Roger Park](#) to be washed away and closed; revealed infill at Rainbow Beach as sand was lost; resulted lake water levels reached the top of the stairs at Calumet Park Beach House; and led to the permanent closing of a third of the [Northerly Island walking path](#)—merely a year after it was opened in 2015.

The threat is only going to continue. Concrete, metal and rock barriers push higher water to unprotected places. Lake levels have always fluctuated, but scientists believe lake levels will continue to trend higher. Regardless of lake level, the increased severity of storm surges due to climate change place our [shoreline communities at greater risk](#) of flooding and damage.

Nature-based solutions are a resilient, long-term, cost-effective method to manage the impact of climate change along the lake and across the city. This approach uses natural

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

ecosystems to provide protection such as wetlands for flood mitigation; trees and prairie spaces to combat the heat island effect; and mangroves to reduce the impact of waves, storm surge, and coastal erosion. These ecosystems also soften climate impacts, such as extreme weather, and reduce climate pollution by capturing carbon dioxide from the air and sequestering it in plants and soils.

Parkland and beaches are already a nature-based solution. The sand, soil, and plantings provide buffering and absorption that helps manage the fluctuation in lake levels and more frequent and severe storms. These green spaces furnish lakefront with recreational or contemplative areas and habitats for humans and wildlife to enjoy.

- How will you support the preservation or expansion of parkland, native plants, and healthy, mature trees and new tree planting across the city to combat climate change impacts that affect the shoreline and inland communities?

I would like to learn more about this particular subject, as we must take swift and bold measures to combat climate change.

RESPONSE ADDRESSING CLIMATE CHANGE:

5) COMMUNITY ENGAGEMENT AND PARK ADVISORY COUNCILS

About 200 of Chicago's over 600 parks, beaches, playlots, and playgrounds have recognized Park Advisory Councils (PACs), resident groups of committed volunteers who support their parks through volunteerism, fundraising and other activities. Many PACs want influence over programs and maintenance and decisions about how parks will be used, but in reality, many feel left out of those decisions. At times, new permits are handed out for large events or art installations and PAC members or leadership don't find out until the event is underway or changes are being made to the park.

- Across the city there is no required or standard process around public notice and community input for park projects. How will you make sure that the public is informed and engaged in development, capital improvements, urban planning, large event or space rentals, and park planning decisions in your ward?
- How will you engage with Park Advisory Councils in urban planning, budgeting, funding decisions, considering capital improvement, determining park programming, and deciding what events or installations are placed in parks in your ward?
- How will you support the formation or the rebuilding of Park Advisory Councils in your ward?

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

Having clear, open communication is key. I also believe building a committee that is inclusive and representational is very important. I will lean on my experience as a union organizer to bring people together to achieve a common goal.

RESPONSE COMMUNITY ENGAGEMENT AND PARK ADVISORY COUNCILS:

6) PARK PRIVATIZATION AND REVENUE

The Park District generates most of its income from property taxes, and over the last decade, its share of those taxes has declined from 6.1% to 4.7%. The average property tax unit pays \$260 towards the Park District's budget.

To supplement income, the Chicago Park District has increased revenue generating activity – raising fees for harbor and golf courses; issuing permits and renting out parks for private festivals; contracting with more concessionaires or other vendors; adding billboard or advertising; renting space for Amazon lockers; increased renting out park buildings and facilities as special event spaces. Some of these activities close off parkland and public facilities for weeks during the summer and over popular weekends, damage park facilities, and create a distraction for park users who seek tranquility or a natural oasis. While some renters and permit holders repair park damage, it takes months for vegetation to regrow or capital improvements to be finished, impeding park use far beyond the closures.

Some of the most notable examples of these revenue generating activities have been new contracts with Lollapalooza, the NASCAR race planned for 2023, and mega-festivals in Douglass Park. Residents across the city cite a feeling that parks have been commercialized and are no longer public, community spaces for people.

- As park district spaces have refocused on revenue-generating outside events, many community partners and programs have been booted from park district buildings and grounds, or can no longer afford to use the space. What policies do you support to prioritize the use of park space for residents and community groups over revenue generating activities and improve community engagement by private groups seeking to operate for profit in public parks?
- The income from these events does not go a specific park, but rather to the Park District budget as a whole, leaving some residents to feel their park bears the brunt of the burden without reaping benefits. How do we ensure the impact and benefits of these rental events or fees are spread equitably?
- In the need to find new funding sources or expand programming, the Park District often balances private or non-profit partners and community programming, users, or needs. At times the interests of these different park users can be at odds. One example is a private baseball program that would like to pay for and install new lights at [Welles Park](#), but

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

some community members are opposed. How will you manage the competing interest of various stakeholders when money is involved?

- When permits are issued for large music festivals or events, like the NASCAR race, the Park District does not have to consult alderpeople, but the event requires resources and time from multiple city departments, such as the police department to manage crowds, CDOT to reorganize traffic, and Streets and Sanitation to clean up. What policies do you support to increase coordination between city agencies, community members, and the Park District when determining what large events happen in parks?
- To what extent should the Park District's budget rely on private, revenue generating events, vendors and concession stands, fees for service, advertisements (i.e. billboards), and renting the parks to for-profit groups?

We should work to make sure that large events have an overall positive impact. We should make sure that local communities and the environment are not harmed or unduly burdened, and that local communities experience a real benefit from these events in a way that incorporates their voices.

When it comes to managing competing interests, I will lean on my 17 years of experience as a lead Shop Steward representing my co-workers at the Palmer House Hilton. I have served on the Union's bargaining team for several contract cycles. I have successfully resolved countless grievances and negotiated contracts covering thousands of hotel workers. I am fully confident in my ability to bring people together to address issues and I have the leadership experience to navigate complex negotiations.

RESPONSE PARK PRIVATIZATION AND REVENUE:

7) BUDGET PROCESS AND RESOURCE ALLOCATION

The Chicago Park District's annual budget process offers a public hearing, an online forum for input, and a vote at an open board meeting. It is questionable whether there is adequate space for resident input or sufficient power and influence ascribed to their input. Many park activists are unaware that the online forums exist or how they would have access to them and they face barriers to attending the public meetings.

- The Chicago Park District should actively engage park stakeholders across the city in the budgeting process, particularly with the Capital Improvement Projects. Efforts should be made to understand and address any barriers to participation from historically disenfranchised populations. What will you do to help the Chicago Park District find ways to extend more budgetary control to the public and incorporate community participation into their annual budgets?

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

- Each year, the Park District accepts submissions for capital improvement requests from a variety of sources. More than one in three requests from elected officials are approved, while only about one in five requests from the public are approved. As an Alderman, how would you use your influence to support capital improvement requests for parks in your ward and across the city?
- Park Advisory Councils have advocated for Menu Money, Tax Increment Financing District Funding, Capital Improvement Programs, Open Space Impact Fees, and Special Service Area Program Funding as resources to supplement Park District funding. As Alderman you have access to and influence over a variety of city funding streams to support projects in your ward. How will you use your influence to support investment and improvement of parks in your ward and the city? What funding priorities would you promote?

We should work to incorporate the voices of the community when it comes to what projects should take priority and involve those residents that are or will be most impacted. When it comes to supporting requests for parks in my Ward, I will rely on my experience of bringing a diverse group of people together as I have done in the hospitality industry to achieve a common goal.

RESPONSE BUDGET PROCESS AND RESOURCE ALLOCATION:

8) PARK ACCESSIBILITY, FACILITIES, & AMENITIES

In the South and West sides of the city, larger park or natural areas are not easily accessible by public transportation. Many parks and natural areas typically lack accessibility for people with disabilities, or only a portion are accessible. While some heavily-trafficked areas like the Lakefront trail may tend to have open and clean bathrooms, many other parks have dirty, locked, or no bathroom facilities. Without access to a bathroom, the time residents can spend or activities they can engage in at a park are limited. Some parks lack lights, clear parking spaces, signs at the entrance, multi-lingual signage or signage throughout to identify elements of the park. In some cases, roads leading into parks are blocked with gates and barricades at all hours.

- What steps will you take to ensure our parks, playlots, beaches, and trails are welcoming and accessible places for everyone?
- Pet owners bring their dogs to parks, playlots, paths, and beaches across the city. Dogs can also be a barrier to other residents' enjoyment or a threat to wildlife. How will you engage with various points of views about dogs in parks?
- As the Chicago Park District plans improvement and maintenance of fieldhouses, playgrounds, and other recreation facilities, how will you prioritize resources based on

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

historic disinvestment faced by some parks and communities? How will you include the community in the decision-making process? How will a commitment to racial equity impact your actions?

- Field houses across the city are often closed on weekends and evenings. These closures mean people lack access to bathrooms, staff assistance or programming. Similarly, park bathrooms outside field house are often locked, or many parks have no bathroom. What will you do to make sure park field houses and the resource they provide can reach more residents?
- Often, new construction developments are allowed to use developer-owned "publicly accessible" green spaces to satisfy open space requirements rather than Chicago Park District-controlled land. When private corporations dictate the development, management, and public access to green spaces, it seldom leads to park spaces desired by Chicago. These privately administered spaces are subject to different operating hours and rules than local parks. Additionally, when departments in the City government collaborate for new development or capital improvement to be "shared," the park users miss out on access or design of the space. An example is Whitney Young's Sports Complex, funded entirely with tax-increment financing. What is your vision to ensuring true public access to new green spaces, facilities, or amenities that are a funded with public dollars or promise public access during construction? How will you use your position to support that vision?

We need to ensure that we can properly maintain our public spaces so they are clean, well lit, accessible, and have robust programming that includes the voices of the community it serves. We must that ensure beautiful, safe, well-resourced public spaces are available in all neighborhoods. We need to bring stakeholders together to marshal the necessary resources to make this a reality.

TIF can be an important resource to stimulate growth in blighted areas. TIF, like any public subsidy, should be used responsibly and promote development that has an overall net positive impact on the construction workers and permanent workers, the surrounding community, and the city as a whole. Having a fair process to evaluate what projects merit TIF is critical. It should include a robust community process that involves community stakeholders to ensure we evaluate projects that are seeking TIF in a way that considers all potential impacts of the project, including the creation of high-quality, safe jobs for construction workers and permanent workers.

RESPONSE PARK ACCESSIBILITY, FACILITIES, & AMENITIES:

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

9) PARK PROGRAMMING

Annually, more than 350,000 people participate through the Chicago Park District in thousands of sports, recreational, cultural, and environmental programs across the city. Yet the distribution of programs is often inequitable and mismatched, failing to meet the needs of local communities effectively. Even preliminary research indicates dramatic inequities across the city in the amount of programs and services offered. At times, programs feel dropped into a community without community input or research. In addition, the programs families are looking to for their health, cultural, and recreation may also be financially out of reach.

Where processes existed under the 1983 Consent Decree to ensure equitably distributed and responsive programming, many parks now lack the programs that are culturally relevant and affordable.

- Parks can be essential resources for people of all ages in a community, especially because they offer classes, camps, pools, exercise equipment and facilities, and chances to socialize. What resources will you invest in parks to prioritize use by diverse populations – seniors, families and children, people with disabilities, and teenagers? How will you ensure park programming is culturally relevant to BIPOC communities that have experienced exclusion and disinvestment?
- What will you do to support residents and community groups to have access to park space and programming for no or low cost?
- Parks across Chicago do not have the same access to sufficient, culturally relevant, and affordable programs or have space maintained to meet the needs of the community. What will you do to ensure equity in park programming and resources (facilities, maintenance, etc.) for parks in your ward and across Chicago, keeping in mind the historic underinvestment in West and South Side parks?
- How will you include the community in program design and program offering in their parks to make sure it is sufficient, relevant, and affordable and to proactively account for external community problems related to public safety and violence?

We should make sure that park programming reflects the needs and interests of the diverse community it serves. This means ensuring that the staff creating the programming has relationships with the community and involves the community deeply in the creating of programming. We should also work to make the programming financially accessible to everyone, no matter one's income level. We should look to implement and expand financial assistance programs to increase access.

RESPONSE PARK PROGRAMMING:

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

10) SAFETY

Feelings of safety and security greatly shape how park spaces are experienced. While some park users feel vulnerable when parks are too empty, others want quiet, wide-open, empty spaces. Some fear gun violence, and others fear oppressive police presence. Some are worried about playground conditions, and others are worried about vandalism. Some want more lights or call boxes. All of these are important considerations as we address safety concerns.

In the summer of 2022, as a response to the death of Chicago teenager, a curfew was enacted at Millennium Park to restrict event access to the park for young residents not accompanied by an adult or attending a ticketed event. In multiple Listening Tour sessions in different parts of Chicago, we heard similar statements that represent a specific loss of access to park amenities after violence occurred in their parks. If the response to select instances of violence in parks is to close, restrict, or remove certain amenities, this seems like the beginning of a very dangerous trend of the Chicago Park District punishing entire communities for the actions of a few.

- How will you approach safety in a way that does not unfairly punish entire communities for the behavior of the few?
We need to have a comprehensive view of public safety. This includes creating a path for those from our most vulnerable communities, especially our youth, to have real careers through high-quality job training and registered apprenticeship programs. This also includes investing in mental health services. We must ensure accountability for police officers, pursue avenues to repair the relationship between the police and communities of color, and ensure the newly elected civilian oversight board has the necessary resources to do their work.
- How would you ensure residents of all ages can access public amenities while balancing concerns for public safety?
- What steps will you take or policies will you support to increase the public safety of Chicago's parks, playlots, playgrounds, paths, and beaches beyond increasing police presence?

We must ensure that our public amenities are accessible be all people, whether they are walking, rolling or biking. We must invest in the infrastructure and maintenance to achieve this. We should invest in robust programming for all ages and all backgrounds so they can enjoy the public amenities within their communities. WE should also invest in community outreach and education so that residents know about these opportunities and can participate.

One piece of ensuring that our public parks, playlots, playgrounds, paths, and beaches in all neighborhoods are safe is making sure they are well-maintained

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

with sufficient lighting, which could help promote positive use by families, residents and visitors. Encouraging organizations and community groups to conduct programming in collaboration with our public spaces will also promote healthy and positive activity there.

RESPONSE SAFETY:

11) PARK DISTRICT OVERSIGHT

- The Chicago Park District is not a department of the city government, but a separate governmental entity. However, the Chicago Park District's Board of Commissioners' members are nominated by the mayor and must be approved by the Committee on Special Events, Cultural Affairs and Recreation. What policies do you support to make sure nominees have **demonstrated relevant experience, background and skills sets related to parks?**
- How will you use your role to provide oversight to the parks, playlots and beaches in your ward?

We should have a diversity of voices, backgrounds and experiences represented on the Chicago Park Districts' Board of Commissioners.

RESPONSE PARK DISTRICT OVERSIGHT:

WARD SPECIFIC QUESTIONS

ADDRESSING CLIMATE CHANGE ADDITIONAL QUESTIONS FOR WARD 5, 7 AND 10

- In 2022, a [community ballot referendum](#) in the 5th, 7th and 10th Wards asked the city to stop cutting down trees in Jackson Park and the area surrounding the South Shore Cultural Center passed by 82%. The trees are at risk due to the construction of the Obama Presidential Center and the proposals to merge Jackson Park and the South Shore Cultural Center golf courses into a new PGA golf course. As Alderman, how will you work to support the community's preference to save the trees in Jackson Park, the South Shore Cultural Center, South Shore Nature Sanctuary, and the surrounding community areas?

ADDRESSING CLIMATE CHANGE ADDITIONAL QUESTIONS FOR WARD 10

A toxic dump occupies 50 acres of shoreline on one of the last critical pieces of land on the South Side to complete Daniel Burnham's vision of a park system spanning the entire Chicago lakefront. The [Chicago Area Confined Disposal Facility \(CDF\)](#) sits on Lake Michigan between the Calumet River and Calumet Park in the 10th ward. The land is owned by the Chicago Park District but leased to the U.S. Army Corps of Engineers to store dredge until full. In 2022, the

2023 CHICAGO MUNICIPAL ELECTION QUESTIONNAIRE

CDF maxed out the storage space and the U.S. Army Corps of Engineers has asked to expand the facility 25 feet vertically to keep it open.

The site, built in the 1980s, is a legacy of previous industrial uses of the river, the only industrial or toxic site on Chicago's shoreline, and is leaking into the Calumet River and Lake Michigan--leaking that could worsen with rising water levels and storm surges fueled by climate change.

- Chicago residents have waited almost 40 years for the land to be returned and created into a public park. As Alderman, what next steps do you support related to the CDF?

PARK PRIVATIZATION AND REVENUE ADDITIONAL QUESTION FOR WARD 24, 25, and 28

- What will you do increase community engagement about the decision to hold festivals in parks, how will you respond to stakeholder feedback, and what will you do to ensure the impact and benefits of these rental events or fees return to Douglass park?

NEW BUILDINGS IN PARKS WARD 26

In 2022 an unpermitted, unapproved building project was undertaken in a non-democratic process with state funds by the National Museum of Puerto Rican Arts & Culture in historic Humboldt Park next to the landmarked former stables building (and office of Jens Jensen).

- Please disclose any formal or informal leadership roles in the community that you have held or currently hold that relate to National Museum of Puerto Rican Arts & Culture and their plan to develop structures on public parkland.
- What did you know about or how were you involved with this project before construction was halted in September 2022?
- How will you offer leadership to remedy this situation?

ADDRESSING CLIMATE CHANGE ADDITIONAL QUESTIONS FOR WARD 48 & 49

- What will you do to support vulnerable shoreline communities from the threat of flooding, erosion, and the impact of climate change?

PARK ACCESSIBILITY, FACILITIES, & AMENITIES ADDITIONAL QUESTION WARD 49

- [Touhy Park](#) has seen an encampment in the park for almost 2 years. The Park District has moved some activities to neighboring parks. The Police Department and the City has a policy not to evict people staying on public land. What policies and actions do you support to address this encampment that will manage the needs of the various people involved?
